1. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed because the prior art individually or taken as a whole does not teach the combination of an electronics container housing a light emitting diode having a dielectric casing, a battery and switch, the container including an anchoring mechanism for anchoring a second end of a solid flexible rod to form a loop, the rod having an elongated length dimension terminated by a first end embedded in the dielectric casing and being made of a material having sufficient clarity and sufficiently dispersive of light such that light entering one of the ends is transmitted along the length dimension and radiates from the rod in substantially all directions along a substantial portion of the length of the rod with an attachment mechanism connected to the rod for stably connecting the rod to the person or object. Claims 3, 5 and 6 depend on and further limit allowed claim 1 and as such are also allowed.

Claim 10 is allowed because the prior art individually or taken as a whole does not teach the combination of an electronics container for containing a light source comprising a semiconductor chip embedded in a dielectric casing, the container having a base, a cap for covering the base, a flexible light transmitting rod having a first end, the light source located to illuminate the first end, a pair of electrical leads attached to the chip and directly contacting a battery, and a cam element located on the cap such that the cam element presses one of the leads into electrical contact with the battery when the cap is rotated with respect to the base.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y Quach Lee whose telephone number is 571-272-2373. The examiner can normally be reached on Monday to Thursday from 8:30 am to 2:30 pm.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the customer service 571-272-2815.
